Here's How it Works

The Rotovac's Dual Rotary Jet Extraction cleaning heads counter-rotate over the carpet at 250 r.p.m. Constructed from solid cast stainless steel, each cleaning head has three protruding vacuum slots and three spray jets producing 1500 multi-directional injection/extraction cleaning passes per minute, thoroughly cleaning all sides of the carpet fiber. The unique dome-shaped design of the cleaning heads encapsulates the spray jets to create a "Steam Chamber" effect in the cleaning zone, delivering maximum heat to the carpet fiber. This powerful combination of heat, agitation and rotary flushing action enables the Rotovac to clean heavily soiled and matted carpet far more effectively than a conventional wand.

Power Extraction With One Hand

The Rotovac Powerwand makes easy work of even the toughest carpet cleaning jobs. The Rotovac leaves the carpet cleaner and drier with far less effort than a wand. The Rotovac's dual high torque gear motors reduce the physical demands of extraction carpet cleaning to an easy one-handed operation.

Works With Any Truckmount or Portable System

The Rotovac dramatically improves the cleaning performance of any portable or truckmount system. Deliver all the power of your extraction system with the Rotovac Powerwand to tackle tough carpet cleaning jobs with confidence.

ONE YEAR FACTORY WARRANTY

Rotovac products are warranted to be free of defects in material and workmanship for a period of (12) months from the date of original purchase unless otherwise stated. A complete warranty policy statement is provided with machine purchase.

Out Cleans All Other Methods...With Ease!

FEATURES

-  **1500 multi-directional cleaning passes per minute**
-  **Leaves carpets cleaner and drier than the wand**
-  **Easy to operate - low fatigue**
-  **Weighs only 38lbs. - Highly maneuverable**
-  **Patented "Steam Chamber" cleaning heads**
-  **Works with any portable or truckmount system**
-  **50 to 800 P.S.I.**
